

Hi Brian

Thank you for your understanding and please accept my apologies for any confusion I have caused you. I have attached a copy of the article in our recent newsletter as a stand-alone page so it can be circulated to members. We will also send a hard copy with a Certificate of Appreciation next week.

Could you please pass on our gratitude to your committee and all of the members, your donation is crucial to the running of the program over these coming months. Your members might like to know that the newsletter has been going to different supporters over the last couple of weeks, approximately 700 people in total. The people receiving the newsletter are just like you in that they care about the community and our work and have been supporting us in various ways so hopefully they will read your story. We have also acknowledged the gift on our SPLaSh [page on our website](#) which you might like to know and we have done a story on our Facebook page previously (seen by 1229 and 109 interactions).

Belinda said she mentioned to you the option of having the Club's logo on the ute used in the program that was supplied by Mornington Mazda. The ute is used by SPLaSh for towing and by the SPCS generally to do things like food pickups, client deliveries and other trips. If this is something you would like to do could you send me a jpeg of your logo?

I am keen for you and your members to feel that we have recognised the club's support so if there are other things you want us to consider please let me know.

Sincerely

Jeremy
